🏠 Edinburgh

👤 09/01/1995

Versatility and knowledge of more than one field are important to me. I'm a creative thinker with a design background, who enjoys the technicality and logic of things. I try to balance these opposites to deliver solutions that are both pleasant to look at and make sense. I continuously try to grow, be it through self-education online or hunched over a book.

Skillset

Languages
Java, Swift
Python
JavaScript
SQL
